

RAJAT GURJAR

DevOps Engineer | Linux System Administrator | Cloud Engineer

Nagpur, India | +91 8805782793 | rajat.gurjar02@gmail.com | linkedin.com/in/rajat-gurjar-5b9a231ba | github.com/RajatGurjar09

PROFESSIONAL SUMMARY

Linux System Administrator and DevOps Engineer with 2+ year of production experience in Linux infrastructure, CI/CD automation, and AWS cloud provisioning using Terraform and Ansible. Maintained 99.9% uptime across 10+ production servers supporting 100+ users and cut incident response time by 15% through Prometheus alerting and Grafana dashboards. Hands-on with Docker, Kubernetes, Jenkins, GitHub Actions, and Bash.

TECHNICAL SKILLS

Cloud & AWS: EC2, VPC, IAM, S3, RDS, CloudWatch, Auto Scaling, ELB, CloudFormation, DynamoDB, AWS CLI

Infrastructure as Code: Terraform, Ansible, CloudFormation, configuration management, automated provisioning

Containers & Orchestration: Docker, Kubernetes (K8s), GKE, Helm, Ingress, Horizontal Pod Autoscaler, RBAC, container orchestration

CI/CD & DevOps: Jenkins, GitHub Actions, CI/CD pipelines, GitOps, Git, deployment automation, version control

Linux, Scripting & Networking: RHEL, CentOS, Ubuntu, systemd, SSH, Bash, Python, cron, iptables, Nginx, UFW, SSL/TLS, DNS, firewall, patch management

Monitoring, Observability & Tools: Prometheus, Grafana, CloudWatch, alerting, log management, root cause analysis, JIRA, MySQL, PostgreSQL, high availability, troubleshooting

WORK EXPERIENCE

Linux System Administrator | Ideas2goal Technology Pvt Ltd

June 2025 – Present

Nagpur, Maharashtra, India

- Sustained 99.9% uptime across 10+ production Linux servers (Ubuntu, CentOS) supporting 100+ users through proactive monitoring, systemd health checks, and incident response runbooks.
- Cut incident response time by 15% by building Prometheus alerting rules and Grafana dashboards that detect CPU saturation, disk exhaustion, and service failures before user impact.
- Automated patch management, log rotation, disk cleanup, and backup verification using Bash scripts and Ansible playbooks, eliminating ad-hoc operations across the server fleet.
- Own SmarterMail and FreeSWITCH production infrastructure — SMTP relay, SSL/TLS certificates, SIP call routing, and SSH-based log forensics — maintaining 99%+ mail delivery and VoIP uptime.

Junior DevOps Engineer | Rostris Infotech Pvt Ltd

May 2024 – May 2025

(Remote)

- Built CI/CD pipelines using Jenkins and GitHub Actions — triggered on Git push/PR events — automating Docker image builds, artifact validation, and rolling deployments for 3 applications.
- Provisioned multi-tier AWS infrastructure using Terraform: EC2, VPC with public/private subnets, IAM least-privilege roles, S3, and RDS — enabling repeatable dev and staging deployments.
- Authored Ansible playbooks for zero-touch configuration management and deployed Prometheus + Grafana observability stack covering CPU, memory, disk I/O, and application-level metrics.
- Administered Linux servers (Ubuntu/CentOS): SSH hardening, iptables/UFW firewall rules, Nginx reverse proxy, cron scheduling, and systemd service management for application workloads.

PROJECTS

AWS Multi-Tier Infrastructure Automation | Terraform, AWS EC2/VPC/IAM/S3/RDS/ELB/Auto Scaling/CloudWatch/DynamoDB

- Provisioned 40+ AWS resources using modular Terraform with S3 remote state and DynamoDB locking — replacing hours of manual setup with a reproducible terraform apply across dev, staging, and production.

Kubernetes Microservices Platform on GKE | Docker, Kubernetes, GKE, Jenkins, GitHub Actions, Prometheus, Grafana, Helm

- Deployed a multi-service application on GKE using Helm charts with namespaces, RBAC, ConfigMaps, Secrets, Ingress, and HPA — automated via a GitOps CI/CD pipeline triggering on every merge to main.

EDUCATION

B.Tech, Electronics & Telecommunication Engineering — Nagpur University

2021 – 2024

Diploma — Govt. Polytechnic Nagpur

2017 – 2020

CERTIFICATIONS

- AWS Cloud Computing Workshop — Amazon Web Services, 2023
- Currently pursuing: AWS Certified Solutions Architect – Associate (SAA-C03)
- Docker, DevOps, Linux Administration, Git & GitHub — Udemy, 2024
